About us

PROFILES WITH PROFILE

A powerful and efficient team is the base for our company success. We have faced the requirements of the market and are today the trademark for innovation, competence and quality in plastic manufacturing. We relentlessly pursue our focus on quality, also in products, processes and management. APU's claim is to provide always the highest quality. We confess a special responsibility to the environment, align each operational work to this subject and know the basics of saving resources as well as a lasting management.

ADVICE

Profiles are illustrated between 60% and 80%. The basic size of the profiles are mm.

Manufacturing differences and tolerances are subject to change.

Our standard program is only available in original packaging. We only deliver special colors and profiles by agreement. Over at all we reserve us other changes.

With this catalogue the older ones get null. Delivery will be carried out according to our delivery and payment conditions.

As may be the case of missprint there is no way of complaint.

The colors in this sheet could be differ because of print technic.

Q-group

STRAIGHT-LINED TRENDSETTER

„Clear cut“ is currently very much in vogue. The hard foam skirting boards from the Q-family follow this trend. The shape of the board follows current design requirements for plain, high-quality and straight lined skirting boards. A modern look and uncomplicated workmanship go hand in hand here, because the boards can be fitted to inner and outer corners quickly and easily with the BOLTA mitre cutter. Skirting boards from the Q-group are available in heights of 40, 60 and 80 mm. The surfaces are finished in smooth, grained and brushed versions; the colour palette ranges from wood and metal looks to selected decor colours in 3D. From a purchase quantity of at least 2,000 metres, we also produce decors according to customer specifications. In addition, the general quality features of the Q-family are the same as those of our entire rigid foam segment: they are insensitive to moisture, dimensionally stable and easy to process.

Skirting boards from the Q-group are available in heights of 40, 60 and 80 mm. The surfaces are finished in smooth, grained and brushed versions.

hard-foam-skirtings

CLASSIC FLOOR SKIRTINGS

Within product innovation BOLTA has developed a large quote of hard-foam-skirtings, which are especially suited for objects. Particular the classic floor skirting, made out of foamed unplasticised- PVC in various sizes and styles with a rigid surface and nevertheless slight in weight. To work the skirting is very easy if you use the BOLTA-punch. This product family is immune to dampness and always keeps form. Two flexible lips to floor and wall drain off subsonic noise. We offer our established profile in selected 3-D or metal-decor-colors with structure or in wood optic.

This product family is immune to dampness and always keeps form.

carpet-skirtings

PROFILES FOR TEXTILES

The skirtings are produced in various styles and colors and guarantee a stunning combination to textile flooring. Our range involves solutions out of foamed-plasticised-PVC and combined materials like rigid-PVC with a soft roof. The chlorine free profile can be easily cut with simple profile scissors. Each profile version has its own characteristics like the self adhesive types, which are specially made for your object. Beyond a high range of equipment alleviates your work.

CONCAVE-SKIRTINGS PROTECT

This skirting has been developed in co-operation with experienced craftsmen for areas, which are most hygiene sensible. The floor can be raised without building corners, when mounting a concave skirting. Ugly and distracting corners could be avoided through radius formation. Benefit from our experience!

👍 **Hygiene is the top priority.**

SKIRTINGS FOR YOUR OBJECT

The profile guarantees an easy and functional wall protection and provide the necessary, individual closure to the wall. The flexible skirtings which can be delivered on rolls, are easy to transport and handle. Additionally we sublimate the skirtings with die stamping to guarantee a high-class surface and a great view. The formation of internal and external corners can be carried out endlessly from the roll. More information for competent hauling you find in our product sheets. Choose the right color out of a considerable line!

SOPHISTICATED REQUIREMENTS

This product range includes numerous profiles for floors, walls and ceilings, made out of foamed, plasticised and unplasticised PVC. For each problem we provide a special profile as solution, for example profiles for edge protection, covings, border-strips, finish-profiles and crossing-profiles. APU offers you the possibility to develop new profile solutions in cooperation, means customer related production of the tool and realisation of a new profile. In this case we indicate to the edge profile article number 32230, which has highly alleviated the work of painter and decorator.

APU offers you the possibility to develop new profile solutions in cooperation, means customer related production of the tool and realisation of a new profile.

Environment

TOWARDS OUR ENVIRONMENT

We understand the principle of a sustainable resource-efficient business management as a major component of our forward-looking corporate policy. Our certified quality management system achieves a continuous minimization of environmental impacts and guarantees the highest possible protection of our employees. Our contribution to environmental protection are measures for heat recovery, a closed cooling water circuit as well as the reduction of waste through extensive recycling and systematic identification and

implementation of energy conservation. As we set special focus on an internal environmental program, we had achieved the continuous reduction of hazardous substances in our products, a complete waiver of toxic ingredients and the greatest possible elimination of substances of the current SVHC-list according to REACH. Concerning our story requirements on eco- and user-friendly products, we exceed the legal level, which only dictates declaration and authorization statements for a number of toxins.
